- 2010 Structured Interdisciplinary Rounds, Northwestern Memorial Hospital
- Acted as Unit Medical Director for a 30-bed nursing unit, leading multidisciplinary rounds among residents, nurses, care facilitators, and pharmacists as a means to improve communication and quality of care. We also measured and directly addressed our unit performance on hospital metrics. Occurred Monday through Friday for an hour each day.
- 2012 – 2013 Team Leader, Inpatient Process & Prep, GI Procedures “Right On Time” Campaign, University of North Carolina Hospitals
- Led a multidisciplinary team of nurses, anesthesiologists and gastroenterologists to review and improve process and preparation for inpatients who require GI procedures. Emphasis was placed on improving morning first case starts. Notable changes included: starting a “Morning Huddle” to discuss daily cases among GI, anesthesia, and nursing; daily communication between GI and anesthesia to facilitate pre-procedure anesthesia triage and evaluations; creation of a standard inpatient endoscopy list that is updated daily and readily available on the electronic medical record; creation of a nursing education tool

and GI procedures “check list” that are available to floor nurses; opened lines of communication with nursing leadership on the floors; creation and designation of a GI procedures nurse who rounds on floor patients, interfaces with floor nurses, and has a mobile phone for direct contact; modification of the GI procedures scheduling template, addition of the inpatient GI attending in the mornings, and scheduling 2 “slam dunk patients” as first case starts to help facilitate efficiency of inpatient procedures; modification of the inpatient bowel prep to include a “Miralax and Gatorade prep” and a split prep. Future goals are to add a GI procedures order set to the electronic medical record.
